SERVICE OVERVIEW / CK-SVC-002

Privacy & Data Protection

Put people, personal information and practical legal compliance at the centre of everyday operations.

What this service achieves

Organisations that collect, process or share personal data and want clearer accountability.

CyberKarl helps organisations understand the situation, choose proportionate safeguards and maintain evidence that those safeguards work.

How we can help

- Privacy and data protection gap analysis
- UK GDPR and Data Protection Act 2018 compliance support
- ISO/IEC 27701 privacy information management alignment
- Data handling, retention and supplier processing reviews
- Privacy risk assessments and DPIA support
- Personal data breach readiness and improvement planning

What you receive

- A clearer view of personal data, uses and accountable teams
- Prioritised steps to reduce privacy and data-handling risk
- Documented processes and evidence to support ongoing assurance

A practical engagement

Stage	What happens
1 Understand	Agree business objectives, scope, stakeholders, important risks and current evidence.
2 Prioritise	Identify material gaps and set achievable, risk-based improvements.
3 Implement	Support the responsible teams with controls, governance, documentation and practical changes.
4 Assure	Review evidence, report progress and adjust the programme as needs evolve.

Relevant standards and guidance

UK GDPR, Data Protection Act 2018, ISO/IEC 27701 and ISO/IEC 27001, where relevant.

Would you like a hand?

Need a clearer picture of your privacy responsibilities? We can help you identify practical improvements without unnecessary complexity.
